

X No thank you

plastic packaging
e.g. yoghurt pots, margarine tubs

Whilst certain packaging may have symbols which suggest it can be recycled e.g. yoghurt pots and plastic food trays, these are made of different types of plastic and there are no sustainable markets to recycle them at present.

Placing recycling in plastic bags also prevents it from being sorted properly. Please place recycling loose in your collection container.

shredded paper

Shredding paper reduces its quality and prevents it from being recycled into high grade paper.

Please take shredded paper to your local paper bank to be recycled into low grade paper or add it to your home compost bin.

gift wrap

Gift wrap doesn't always contain much paper and is often layered with foil and plastic which cannot be recycled.

drinks cartons

Due to the costs and environmental impacts associated with transporting drinks cartons to be reprocessed (the nearest facility is in Germany), it is more sustainable to recover energy from them in Hampshire.

Household rubbish collected in Hampshire is sent to one of our three Energy Recovery Facilities, which generate enough electricity to power more than 50,000 homes.

What else can you recycle?

glass

You can recycle glass bottles and jars:

- through your separate collection service
- at your local recycling bank
- at your local Household Waste Recycling Centre (HWRC).

mixed textiles & clothes

You can recycle unwanted clothes, shoes (in pairs), blankets etc:

- at one of the many textile recycling banks
- at your local Household Waste Recycling Centre
- at charity shops.

garden waste

You can recycle garden waste:

- at home – garden waste, along with vegetable and fruit peelings can be easily composted at home
- through your separate collection service
- at your local Household Waste Recycling Centre.

We recycle your garden waste into Pro-Grow - Hampshire's own peat free soil conditioner. You can buy Pro-Grow at any HWRC and in bulk. For bulk orders call **01962 764068**

For Hart information call **01252 622122** or visit www.hart.gov.uk

PRINTED ON REVIVE RECYCLED PAPER

Recycling made easy

Part of the Project Integra Partnership

✓ Yes please

You can put all of the following items in your recycling bin clean, dry and loose:

paper

All clean paper – newspapers, magazines, envelopes (even with windows), junk mail, scrap paper, directories, yellow pages, brochures and catalogues (*please take off any plastic wrappers around magazines or junk mail etc*).

cardboard

All cardboard – cereal and other food packs, greetings cards, boxes (*please flatten or cut up big boxes first*).

food tins, drink cans & aerosols

All types of tins, cans and empty aerosols, (*please rinse tins and cans and remove loose plastic lids from aerosols. Do not pierce or squash aerosols and those with orange hazard labels are not accepted*).

plastic bottles

All plastic bottles – including drinks, milk, shampoo, cleaning and washing up liquid bottles.

It is very important to put **only these items** into your recycling bin - dealing with the wrong items is expensive and sometimes results in good recycling being wasted.
