Hello,

I have lived my whole life (40 years) in and around Cookham village and Fleet and feel that all the recent developments focused on and around what used to be green spaces in the area has had a detrimental impact on people's way of living not mentioning the impact on the environment. I believe that having a local gap between the Villages and towns helps preserve the separate identity of Crookham Village. The local gap provides unique character which should not be eroded by infill development.

I use the footpaths regularly with my family at least once a day for walking the dog and taking the kids to school its an educational walk as we see lots of wildlife mainly deer. It is an area of outstanding beauty and should be maintained for future generations to enjoy.

Yours sincerely,

Daniel Frankland.
