I am writing to express my total support regarding the local gaps between Crookham Village, Church Crookham, Dogmersfield & Fleet (Ref. Policy NE01).

Each area has it's own individual character and should never be merged/squashed into one overriding conurbation.

These open spaces are vital to the local communities who enjoy the freedom of walking through them as well as supporting all the important biodiversity of the wildlife.

Since moving from Sandhurst 3 years ago, I am staggered at the amount & size of the housing developments in & around Crookham Village. There seems to be scant regard to maintaining any balance between continuous housing development and keeping some very much essential natural countryside untouched.

Kind regards,

Mike King
