I would like to write to offer my objection to building in the green land between Crookham village and the surrounding Church Crookham and Fleet area.

This local gap is of huge importance to the local community, and gives Crookham Village it's own identity and character without merging with the bigger villages resulting in a loss of community.

The natural beauty and unique character of the landscape should be preserved, we are too quick to build more new houses without looking around to see what's important and the effect it would have on the local environment and community.

As a dog walker we use the footpaths regularly and enjoy the lovely unique and diverse landscape that is teamed with wildlife, destroying this area will destroy the wildlife that resides in it.

With the grove farm and watery lane developmenta already eroding what green spaces we have left, this would deplete them all together, green spaces are valuable not only to the community but also the health of our future generation.

Your sincerely
Nadine Laws
